

Greetings **World Congress on Global Optimization**
conference attendees!

We wish that we were seeing you in Athens and hope for the opportunity to meet up,
face-to-face, in the near future. Have an enjoyable conference!

Please browse the news, special feature books and journals in the next pages.

Springer has provided you with a **special code** for a 20% discount to use for orders on **ALL**
Springer Books/eBooks valid from July 7–August 31, 2021.

NEWS

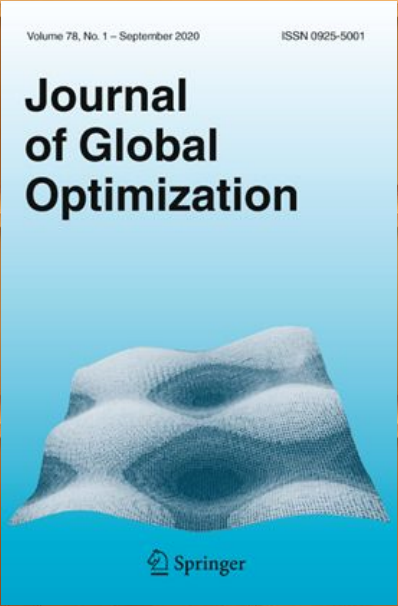

Lecture Notes in Operations Research is an interdisciplinary book series which provides a platform for the cutting-edge research and developments in both operations research and operations management field. The purview of this series is global, encompassing all nations and areas of the world.

It comprises for instance, mathematical optimization, mathematical modeling, statistical analysis, queueing theory and other stochastic-process models, Markov decision processes, econometric methods, data envelopment analysis, decision analysis, supply chain management, transportation logistics, process design, operations strategy, facilities planning, production planning and inventory control.

LNOR publishes edited conference proceedings, contributed volumes that present firsthand information on the latest research results and pioneering innovations as well as new perspectives on classical fields. The target audience of LNOR consists of students, researchers as well as industry professionals.

SPECIAL FEATURE JOURNALS

Special Issue on Global Multiobjective Optimization

Submit to an upcoming Special Issue

Current Call for Papers

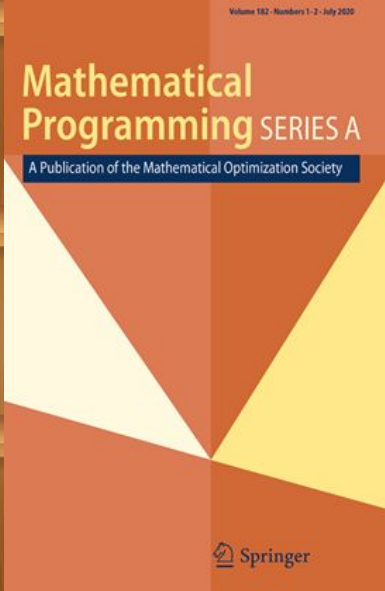

Special Issue on Optimization Models and Solutions Techniques

HIGHLIGHTED SPECIAL ISSUES

**Special Issue on
New Trends on
Combinatorial
Optimization for
Network and
Logistical
Applications**

**Special Issue on
New Trends on
Simulation-
Optimization in
Manufacturing and
Services**

**Special Issue on Set
Optimization and
Applications**

**Special Issue on
Dynamic
Optimization in
Management and
Economics**
